

# ProWin for Textiles

## Features

- \* ProWin 2000 is a powerful Spinning Production, Power and RH Management Tool for department from Blowrome to Ring Spinning, Looms. It offers flexible solution to typical Production Management Problems. An impressive number of more than 200 installation of ProWin verify this.
- \* ProWin 2000 acts as a front end to a back process deploying state of Art PLC's and communication tools to realize a networked production Management System. ProWin is built around industry standard PLC control electronics and interfaces making it the most reliable networked monitoring system in the world for this application. Open architecture of ProWin is further evident in the wide range of machinery and flexibility in configuring fault inputs.

## Specifications

PLC	VIPA 315 SB (315 - 4NE12, 24VDC, 2 MB, Remote I/O's ProfiBus DP, MPI, 2 EtherNet Port )
Digital Input	700 Nos
Analog Input	50 Nos
Outputs	
Networking	ProfiBus
Communication	ProfiBus DP
Panels	RITTAL with IP 55
Compliance	IEC, UL, CSA
Scope of our Supply	Design, Development, manufacture of Panels and SCADA development and implementation

**Applied Control Equipment Systems**
