

Paper Plant Automation

Features

- * Paper Reel Rolling and Packing system
- * It is control panel specially designed for packing paper, film, and other similar materials manufactured in Reels. The machine is designed to apply layers of film across the face diametrically and wrap them along the longitudinal axis, which are moved along the periphery with uniform overlap forming a cocoon type of packing. This packing is completely moisture and dust proof and protect the products. To do various motors to be operated using transducers. The plc panel does with logical program.

Specifications

PLC	VIPA 214 (CPU 214 DP, 24VDC, 48KB RAM, ProfiBus DP)
Input	114 Nos
Outputs	114 Nos
Networking	
Communication	RS485 MPI
Panels	RITTAL SS
Compliance	IEC, UL, CSA
SCADA	
Project	Implemented at a leading Paper Industry in South India.
Scope of our Supply	Design, Development, Manufacture of Panels and SCADA development and implementation
