

Continuous Balepress

Our Integrated Panel (PLC Panel) with the specification as detailed in the below, helps to accomplish the following features:

- * Horizontal fully-automatic baler machine type, helps feeding, compressing, baling and ejecting bale automatically, realize no-worker operation and improve production efficiency to utmost.
- * Adopt special automatic binding system, with high speed, simple frame, stable working condition and low failure rate and ease of maintenance.
- * You can choose feeding material by conveyor or Hopper or manual or connect with your production line.
- * Suitable for compressing and recycling paper, Scrap-Plastic and Metal Scrap Shedder.

Specifications

PLC	Micro Logix 1766 - L32BxB
HMI	Panel View - 800
Input	39
Analog Input	04
Outputs	23
Communication	Ethernet IP
Panels	RITTAL with IP 55
Compliance	IEC, UL, CSA
SCADA	FT ME
Project / Product	Equipment supplied to OEMS
Scope of our Supply	Design/Development/Manufacturing of Panels/ SCADA Development and Implementation.
